
The
Barbies
Game Pitches

Game 1 Overview

Gameplay loop:

- Work as a pair, to defuse a bomb by solving puzzles.
- One player on computer, one playing with a custom “bomb” controller.
- Collaborate and solve your own puzzles simultaneously to defuse the device before it explodes.
- Beat harder levels and beat other peoples times.

User Goals

Player On Computer:

Short term:

- Solve small puzzles to progress through the game
- Give information/collaborate with other player to solve puzzles

Long term:

- Defuse the bomb

Player With Device:

Short term:

- Solve physical puzzles on the device to help computer player progress through the game
- Give information/collaborate with other player to solve puzzles

Long term:

- Defuse the bomb

Innovative tech

- Custom Interactive Hardware
  - Controller rotation affects the game experience.
  - Physical buttons/switches/wires interact with puzzles inside the game.
  - Multiple different components to keep track of, “skill checks”, memory games, physical puzzles etc…
